### TINY TOTS Ages 3-5

Introduces and familiarizes children to the aquatic environment and helps them acquire basic aquatic skills that lay the foundation for developing water competency and the future skill development of swimming strokes. In addition, it helps participants begin to develop positive attitudes and safe practices in and around the water.

### BEGINNER Ages 6-12

Introduces and familiarizes children to the aquatic environment and helps them acquire basic aquatic skills that lay the foundation for developing water competency and the future skill development of swimming strokes. If participants participate in more than one session during the summer, continued development of water competency and further skill development will be explored, leading to independent aquatic locomotion skills. We continue to explore the water using simultaneous and alternating arm and leg actions on the front and back to gain greater proficiency in preparation for performing strokes. This class spans Level 1 & 2 of the Learn-to-Swim curriculum.

### INTERMEDIATE/ADVANCED Ages 6-12

Builds on existing aquatic skills and knowledge. Participants begin to perform skills at a slightly more advanced level. Rudimentary movements like streamlining and the development of an effective freestyle and elementary backstroke are explored. Participants who participate in more than one session or with a more advanced knowledge of basic strokes will explore more advanced aquatic skills such as breast stroke and diving.
