

## **Pepco Energy Services - Energy Savings Performance Contract, phase 2**

The City of Greensboro is initiating a 2<sup>nd</sup> phase of its energy savings performance contract with Pepco Energy Services. The first phase was a \$6.1 million project in 2009 paid for through the guaranteed energy savings to 46 of the City's facilities including the large center city facilities, as well as fire & police stations, recreation centers, and libraries.

The second phase is a \$1 million dollar project for an additional 14 facilities also paid for through the guaranteed savings. The facilities include the Patton Avenue site, Barber & Bryan parks, the Kitchen Operations Center, and additional recreation centers. The energy conservation measures to be installed include energy efficient lighting and controls, water savings fixtures, irrigation improvements, and a new chiller. The project should be completed by the end of the year, and save the City nearly \$100,000 per year in utility costs.
