

“What to Do in Case” Series

Greensboro Police Department

Your infant is not breathing:

- Have someone call 911.
- Do not move your child if you think he might have a spinal cord, neck, or back injury.
- Open your baby’s mouth and remove any visible obstructions to the airway.
- If the baby is unconscious, has no pulse, and is not breathing, immediately begin CPR.
- Continue CPR until relieved by first responders.
