

Making Homes Safer

Presenter and Instructor Biographies

Marco Santo Domingo

Domingo has been with Housing and Urban Development (HUD) since 2015, supporting the Uniform Physical Condition Standards for Vouchers demonstration program as the communications lead for the Inspection Standards and Data for Voucher Division within HUD Real Estate Assessment Center. Domingo graduated from Virginia Tech in 2007 and previously worked at CACI International as a business analyst. He also served in the United States Peace Corps from 2013-2015 in Malawi, Africa as a business and environmental advisor.

Jayne Windham

Windham is a consultant for the Stop Pests program at Cornell University's Integrated Pest Management Center, which provides free training and technical assistance to housing authorities and project-based Section 8 programs. Windham has more than 20 years of experience in housing and community development programs, including construction oversight for publicly funded projects. Windham develops and teaches courses in housing construction and rehabilitation, healthy homes, and integrated pest management. She is a credentialed Healthy Homes Specialist, holds a Bachelor's of Science in engineering management, and has worked in construction management and weatherization.

Jeffery W. Dellinger

Dellinger is an industrial hygiene consultant supervisor with North Carolina Department of Health and Human Services, Division of Public Health. He has more than 25 years of experience in lead-based paint management. He received his Bachelor of Science in environmental health science and psychology from Western Carolina University. He is a North Carolina certified lead-based paint inspector, risk assessor, supervisor, and designer. He has trained as a North Carolina lead-based paint renovator. He provided technical review and changes to the North Carolina Childhood Lead Poison Prevention Program's "Guidelines for Lead Inspections/Risk Assessments/Scope of Work and Clearances" (2011). Dellinger was a principal author for North Carolina Lead-Based Paint Renovation, Repair and Painting "NCRPP-Update" (2012).

Neasha Graves

Graves is a community outreach and education manager for the UNC Institute for the Environment's [Environmental Resource Program](#), coordinating environmental health outreach programming aimed at helping the public understand environmental health issues and collaborating with community partners who serve at-risk populations affected by these environmental health conditions. Graves earned her Bachelor of Arts in history at Meredith College in Raleigh and a Master in Public Administration at NC Central University in Durham.

Dr. Ricky Langley

Langley is a medical consultant with the North Carolina Division of Public Health's Occupational and Environmental Epidemiology Branch. He has 30 years of experience in occupational and environmental medicine. He works closely with industrial hygienist in his branch and provides medical advice to physicians that see cases of heavy metal poisoning.
